Introduction

The names, logos, emblems, slogans, vehicle model names, and vehicle body designs appearing in this manual including, but not limited to GM, the GM logo, CHEVROLET, the CHEVROLET Emblem, CAMARO, the CAMARO Emblem, and MyLink are registered trademarks and/or service marks of General Motors LLC, its subsidiaries, affiliates, or licensors.

The information in this manual supplements the owner manual.

This manual describes features that may or may not be on the vehicle because of optional equipment that was not purchased on the vehicle, model variants, country specifications, features/applications that may not be available in your region, or changes subsequent to the printing of this manual.

Keep this manual with the owner manual in the vehicle, so it will be there if it is needed. If the vehicle is sold, leave this manual in the vehicle.

Overview

Read the following pages to become familiar with the infotainment system features.

⚠️ Warning

Taking your eyes off the road for too long or too often while using any infotainment feature can cause a crash. You or others could be injured or killed. Do not give extended attention to infotainment tasks while driving. Limit your glances at the vehicle displays and focus your attention on driving. Use voice commands whenever possible.

The infotainment system has built-in features intended to help avoid distraction by disabling some functions when driving. These functions may grey out when they are unavailable. Many infotainment features are also available through the instrument cluster and steering wheel controls.

Before driving:

- Become familiar with the operation, faceplate buttons, and screen buttons.
- Set up the audio by presetting favourite stations, setting the tone, and adjusting the speakers.
- Set up phone numbers in advance so they can be called easily by pressing a single button or by using a single voice command if equipped with Bluetooth phone capability.

See "Defensive Driving" in the owner manual.
To play the infotainment system with the ignition off, see “Retained Accessory Power (RAP)” in the owner manual.

**Customer Assistance**

Assistance is available to help with Bluetooth pairing, application downloading and installation, other mobile device interface, and operation support of the infotainment system. Contact your dealer.

**Infotainment System**

The infotainment system is controlled by using the infotainment display, the radio faceplate buttons, steering wheel controls, and voice recognition.

1. 🏡 (Home Page)
2. ⏪
3. ⏯ (Power)
4. ⏹
5. ⚪️ BACK

- When off, press ⏯ to turn the system on. Press and hold to turn off.
- When on, press ⏯ to mute the system. Press ⏯ again to unmute the system.

**Volume**

Turn ⏯ to increase or decrease the volume.

When the power is on and the system is not muted, a quick status pane will display when ⏯ is pressed. Pressing ⏯ will mute the
4 Introduction

system and trigger this pane to show a long press is required to actually power down the system.

- AM, FM, or DAB: Press to seek to the previous strong station. See AM-FM Radio \(\uparrow 9\).
- USB, AUX, or Bluetooth Audio: Press to see the beginning of the current or previous track.
- USB, AUX, or Bluetooth Audio: Press and hold to quickly reverse through a track. Release the button to return to playing speed. See USB Port \(\uparrow 15\), Auxiliary Jack \(\uparrow 18\), or Bluetooth Audio \(\uparrow 19\).

: Press to go to the Home Page. See “Home Page” following.

: Press to return to the previous screen in a menu.

Home Page

The Home Page is where vehicle application icons are accessed. Some applications are disabled when the vehicle is moving.

The Home Page can be set up to have up to five pages with eight icons per page.

- USB, AUX, or Bluetooth Audio: Press and hold to fast forward through a track. Release the button to return to playing speed. See USB Port \(\uparrow 15\), Auxiliary Jack \(\uparrow 18\), or Bluetooth Audio \(\uparrow 19\).

: Press to go to the next Home Page.

: Touch to display the favourites list.

Touch and hold a location within the favourites area to begin the process of saving a favourite application.

Touch the application icon to store as a favourite. The name of the application will be shown in favourites.

Managing Home Page Icons

1. Touch and hold any of the Home Page icons to enter edit mode.
2. Continue holding the icon and drag it to the desired position.
3. Release your finger to drop the icon in the desired position.
4. To move an application to another page, drag the icon to the edge of the screen toward the desired page.

5. Continue dragging and dropping application icons as desired.

6. Press  to exit edit mode.
6 Introduction

If equipped, some audio controls can be adjusted at the steering wheel.

* (1) : Press to answer an incoming call or start voice recognition. See Bluetooth (Overview) ▷ 52 or Bluetooth (Infotainment Controls) ▷ 53 or Bluetooth (Voice Recognition) ▷ 56.

/ (1) : Press to decline an incoming call or end a current call. Press to mute or unmute the infotainment system when not on a call.

+ or − (2) : Press to increase or decrease volume.

FAV or FAV (3) : Press to display a list of favourites. Press again to select the next or previous favourite when listening to the radio.

Using the System

Infotainment Display Buttons

Infotainment display buttons show on the screen when available. When a function is unavailable, the button may grey out. When a function is selected, the button may highlight.

Home Page Features

Touch the icons on the Home Page screen to launch an application.

Audio

Touch the AUDIO icon to display the active audio source page. Available sources are AM, FM, DAB, My Media, USB, Bluetooth, and AUX Input.

Phone

Touch the PHONE icon to display the Phonemain page. See Bluetooth (Overview) ▷ 52 or Bluetooth (Infotainment Controls) ▷ 53 or Bluetooth (Voice Recognition) ▷ 56.

Projection

Touch the PROJECTION icon to activate Android Auto™ or Apple CarPlay™ (if equipped) after a supported device is connected. See Apple CarPlay and Android Auto ▷ 58.

NAV (Navigation)

If equipped, touch the NAV icon to display the navigation map. See Using the Navigation System ▷ 21.

Settings

Touch the SETTINGS icon to display the Settings menu. See Settings ▷ 60.

Lighting

If equipped, touch the LIGHTING icon to display the Settings screen button for the ambient light modes. See “Interior Lamps” in the owner manual.

Climate

Touch the CLIMATE icon to display the Climate main page. See “Dual Automatic Climate Control System” in the owner manual.

Rear Climate

If equipped, touch the R. CLIMATE icon to display the Rear Climate main page. See “Rear Climate Control System” in the owner manual.
Applications Tray

The applications tray is at the top centre of the screen. It can have three to five applications.

To add an application from the Home Page to the applications tray:

1. Touch and hold any icon on the Home Page to enter edit mode.
2. Drag the icon to the applications tray.

To remove an item from the applications tray, drag the icon from the applications tray back to the Home Page.

Press 🗗 to exit edit mode.

Adding or removing applications from the applications tray will not remove them from the Home Page.

Infotainment Gestures

Use the following finger gestures to control the infotainment system.

Touch/Tap

Touch/tap is used to select a button or option, activate an application, or change the location inside a map.

Touch and Hold

Touch and hold can be used to start another gesture, move, or delete an application.

Drag

Drag is used to move applications on the Home Page, or to pan the map. To drag the item, it must be held and moved along the screen to the new location. This can be done up, down, right, or left.
8 Introduction

Nudge

Fling or swipe is used to scroll through a list, pan the map, or change page views. Do this by placing a finger on the screen then moving it rapidly up and down or right and left.

Turn

Turn the knob on the faceplate to perform functions such as increasing or decreasing the volume.

Cleaning High Gloss Surfaces and Vehicle Information and Radio Displays

For vehicles with high gloss surfaces or vehicle displays, use a microfibre cloth to wipe surfaces. Before wiping the surface with the microfibre cloth, use a soft bristle brush to remove dirt that could scratch the surface. Then use the microfibre cloth by gently rubbing to clean. Never use window cleaners or solvents. Periodically hand wash the microfibre cloth separately, using mild soap. Do not use bleach or fabric softener. Rinse thoroughly and air dry before next use.

Software Updates

Over-the-Air Software Updates

See Settings 60 for details on software updates.
Radio

AM-FM Radio

Playing the Radio
Touch AUDIO on the Home Page. While on the Audio main page the available sources are AM, FM, DAB, My Media, USB, Bluetooth, and AUX Input.

Infotainment System Settings
Touch the AUDIO icon to access broadcast sources.

Touch the MENU screen button to display the following menus:

Tone Settings:
- Bass, Midrange, Treble, Surround (if equipped): Touch + or − to adjust. Surround adjusts the headrest speaker volume only.
- Balance: Touch < or > for more sound from the left or right speakers. The middle position balances the sound between the left and right speakers.
- Fade: Touch \ or \ for more sound from the front or rear speakers. The middle position balances the sound between the front and rear speakers.

DSP Modes (If Equipped):
- Bose® Centerpoint® surround sound system has four DSP modes:
  - Normal: Adjusts the audio to provide the best sound for all seating positions.
  - Driver: Adjusts the audio to provide the best sound for the driver.
  - Rear: Adjusts the audio to provide the best sound for the rear seat occupants.
  - Centerpoint: Turns on Bose Centerpoint surround technology. This setting creates a surround sound listening experience from nearly any audio source: existing stereo, CD collection, and MP3 players. For more information on Bose Centerpoint surround technology, see www.bose.com/centerpoint.

Categories: Touch Categories under the Audio menu to access the categories list for AM-FM. The list contains names associated with the AM-FM channels. Touch a category name to display a list of channels for that category. Selecting a station from the list tunes the radio to that channel and returns the display to Now Playing.

EQ: If equipped with a Bose sound system, the Equaliser settings are selected through the tone settings menu. Touch the left or right arrows to cycle through the EQ options. The available choices are Manual and Talk.

Auto Volume (If Equipped): This feature adjusts the volume based on vehicle speed. The options are Off, Low, Medium - Low, Medium, Medium - High, or High. Touch \ to go back to the previous menu.
10 Radio

Bose® AudioPilot® noise compensation technology (If Equipped): This feature adjusts the volume based on the noise in the vehicle and speed. When turned on, AudioPilot technology detects ambient noise and vehicle speed to continuously adjust many aspects of the audio signal so that music will sound the same at a set volume level.

The options are On and Off.

This feature is most effective at lower radio volume settings where background noise can affect how well the music is being played through the vehicle’s audio system. At higher volume settings, where the music is louder than the background noise, there may be little or no adjustments by AudioPilot.

HD Radio™ (If Equipped): For AM and FM only, touch to turn HD Radio (if equipped) reception on or off. Press BACK or touch to go back to the previous menu.

Finding a Station

Seeking a Station

Press or on the faceplate to search for the previous or next strongest station.

Tuning a Station

Touch the SEEK screen button to switch to TUNE. Touch again to change back. Touch or to manually search for a station.

Update Station List: For AM, FM, and DAB only, touch to update the station list. Press BACK or touch to go back to the previous menu.

Direct Tune

Access Direct Tune by touching the interaction selector TUNE screen button to bring up the keypad. Navigate up and down through all frequencies or directly enter a station using the keypad. When a new station is entered, the information about that station displays on the right side. This information will update with each new valid frequency it is tuned to.

The keypad will grey out entries that do not contribute to a valid frequency and will automatically place a decimal point within the frequency number, as needed.
A valid station will automatically tune to the new frequency but not close the direct tune window. Touch the or Exit screen buttons.

The tune arrows on the right side of the direct tune display tune through the complete station list one station step at a time per touch. A touch and hold advances 10 frequency steps per second.

Touch (X) to delete one character at a time. Touch and hold (X) to delete all characters.

In AM-FM modes, touch or for the radio to go to the next or previous strong station. Touch Direct Tune to advance to the next or previous frequency step in AM or FM mode or directly enter or tune to the frequency on the keypad.

HD radio multicast stations cannot be tuned directly through the direct tune feature. Only the analogue or HD1 station can use that feature. Use the TUNE button to adjust to the multicast stations.

**AM-FM Categories**

AM-FM Categories are available under the AM-FM audio menu. Touch AM-FM Categories to access the AM-FM Categories list.

The categories list contains category names associated with AM-FM Channels. Selecting a given category name displays a list of channels for that category.

**Storing Radio Station Presets**

Favourites are stored in the area at the bottom of the screen.

Up to 60 preset stations can be stored under the following:

**AM, FM, DAB, HD Radio Stations**

Touch and hold a favourite screen button to save the current station as a favourite. Touch a favourite screen button in the favourite area to recall a favourite station.

**Mixed-Audio Favourites**

Favourites that can be stored include radio stations, media favourites, contacts, destinations, navigation, or applications.

To scroll through the favourites:

- Drag up on the top border of the favourites bar to view the favourites. To close the favourites, drag them down.
12 Radio

- Slide a finger to the right or left to scroll through each page of favourites.

**Tone Settings**: Touch and hold a screen button to save the current tone settings as a favourite in the tone settings screen. Drag up on the reveal button at the bottom to bring up favourites. Touch a favourite screen button in the favourite area to recall a favourite tone setting.

The number of favourites displayed is automatically adjusted by default, but can be manually adjusted in the Settings menu under Radio and then Number of Favourites Shown.

**Radio Data System (RDS)**

The audio system has an RDS. RDS features are available for use only on FM and DAB stations that broadcast RDS information. With RDS, the radio can:

- Seek to stations broadcasting the selected type of programming
- Receive announcements concerning local and national emergencies
- Display messages from radio stations

This system relies on receiving specific information from these stations and only works when the information is available. In rare cases, a radio station may broadcast incorrect information that causes the radio features to work improperly. If this happens, contact the radio station.

The RDS system is always on. When information is broadcast from the current FM station, the station name or call letters display on the audio screen. RDS may provide a program type (PTY) for current programming and the name of the program being broadcast.

When RDS signal information has been detected, the metadata fields will be updated on the infotainment display to show the RDS data. The radio text will be updated any time new information is received.

The RDS fields on the screen will show in the order of:
- Frequency and/or RDS-PSN.
- RDS text line one is the information provided by the broadcast.
- RDS text line two and three is RDS text. Line three is used only if necessary, to wrap over from the text on line two.

If the RDS text information overflows from line two and three, the previous information given on line two and three will clear. The overflow of information will finish starting from the previously used line two and then if necessary, line three.

If an RDS text update occurs during the paging, the display fields are cleared and the new information is displayed, beginning on line two.

Once the entire broadcast text is finished paging, the amount of text that can fit in lines two and three will be displayed and an ellipsis will indicate further text exists.
RDS Traffic Volume Setting

Traffic alert volume can be adjusted by turning the volume up or down while the alert is playing. The system will store this setting for future traffic alerts.

If the current source is playing at a higher volume than the traffic alert volume setting, the traffic alert will play back at the current source volume setting. If the current source is playing at a lower volume than the traffic alert volume setting, the traffic alert will play at the volume set for traffic.

Once an alert is complete, the system volume returns to its previously set level prior to the traffic alert.

If the traffic alert volume is set to zero during an alert, the next traffic alert will play at the minimum connection volume level.

If stations or sources are switched during a traffic alert, the current traffic alert will be cancelled.

If the RDS On/Off option is set to Off, and the Traffic Programme (TP) is set to On, a traffic alert will automatically override the Off setting and place the RDS mode to On.

The default station list is sorted by RDS stations first, in order of signal strength, and followed by non-RDS stations grouped at the end of the list.

Stations that support traffic programming are marked TP and show on the right side of the line item.

HD Radio Technology

HD Radio Technology is a free service with features such as static-free sound, more stations built onto the frequency such as HD2 and HD3, and on-screen information such as artist and song title.

Channel Access

To access HD Radio channels:

1. Tune the radio to the channel. If the channel is broadcasting HD Radio Technology, the radio will automatically switch to digital audio, indicated with an HD logo if HD Radio is turned on.

2. Touch $\ll$ or $\gg$ to tune to the previous or next HD Radio channel.

There may be a delay before the channel starts playing.

The HD Radio channel number is indicated next to the logo.

HD Radio channels can be saved as favourites. Songs can be tagged for download.

When connected to iTunes®, the Sync button on the device may need to be touched to transfer the tags to iTunes.

See AM-FM Radio ♩ 9 or USB Port ♩ 15.
14 Radio

For a list of all channels, see www.hdradio.com.

Troubleshooting

Digital Audio Delay: Wait for the signal to process. This can take several seconds.

Volume Change, Audio Skip, Echo, Digital Audio Lost: Channel signal strength may be weak or the channel is out of range. Verify proper reception on another channel.

If the HD Radio signal loses reception while listening to channel HD1, the radio will go back to the main non-HD Radio channel.

If the HD Radio signal loses reception while listening to channels HD2 to HD8, the radio mutes until the signal can be recovered or until the channel is changed.

HD can be disabled if driving in a weak signal area. Touch Menu from the AM/FM screens, then touch HD Radio to toggle HD on and off.

Radio Reception

Unplug electronic devices from the accessory power outlets if there is interference or static in the radio.

FM

FM signals only extend about 16 to 65 km (10 to 40 mi). Although the radio has a built-in electronic circuit that automatically works to reduce interference, some static can occur, especially around tall buildings or hills, causing the sound to fade in and out.

AM

The range for most AM stations is greater than for FM, especially at night. The longer range can cause station frequencies to interfere with each other. Static can also occur when things like storms and power lines interfere with radio reception. When this happens, try reducing the treble on the radio.

Mobile Phone Usage

Mobile phone usage, such as making or receiving phone calls, charging, or just having the phone on may cause static interference in the radio. Unplug the phone or turn it off if this happens.

Aerial (Convertible Only)

The AM-FM aerial is integrated in the rear spoiler.

No maintenance or adjustments are needed. Do not place loads on the spoiler.

If the spoiler is replaced, be sure it is replaced with the correct GM parts for the best AM or FM reception.

Multi-Band Aerial

The multi-band aerial is used for GPS (Global Positioning System). Keep the aerial clear of obstructions for clear reception. If the vehicle has a sunroof, the performance of GPS may be affected if the sunroof is open.

Unplug electronic devices from the accessory power outlets if there is interference or static in the radio.
Audio Players

Avoiding Untrusted Media Devices
When using media devices such as CDs, DVDs, Blu-Ray Discs®, SD cards, USB drives and mobile devices, consider the source. Untrusted media devices could contain files that affect system operation or performance. Avoid use if the content or origin cannot be trusted.

USB Port
This vehicle may have two USB ports in the centre console. These ports are for data and charging.

Playing from a USB
A USB mass storage device can be connected to the USB port.

Gracenote®
When plugging in a USB device, Gracenote service builds voice tags for music. Voice tags allow artists, albums with hard to pronounce names, and nicknames to be used to play music through voice recognition.

While indexing, infotainment features are available.

My Media Library
Allows access to content from all indexed media sources. Touch the MEDIA screen button to scroll through the options until My Media is selected. Use gestures or screen buttons to scroll through the content.

USB MP3 Player and USB Drives
- The USB MP3 players and USB drives connected must comply with the USB Mass Storage Class specification (USB MSC).
- Hard disk drives are not supported.
- The following restrictions apply for the data stored on a USB MP3 player or USB device:
  - Maximum folder structure depth: 11 levels.
- Applicable audio extensions are mp3, wma, aac, m4a, and aif.
- WMA and Apple lossless files are not supported.
- Supported file systems are FAT32 and NTFS.

To play a USB device, do one of the following:
- Connect the USB.
- Press MEDIA until the connected device is shown.

Use the following when playing an active USB source:
- Touch to play the current media source.
- Touch to pause play of the current media source.
- Touch to seek to the beginning of the current or previous track. If the track has been playing for less than five seconds, the previous track plays. If playing
16 Audio Players

- Touch and hold to reverse quickly through playback. Release to return to playing speed. Elapsed time displays.
- Touch to seek to the next track.
- Touch and hold to advance quickly through playback. Release to return to playing speed. Elapsed time displays.
- Touch the shuffle icon on the interaction selector to shuffle through the available media.
- Touch the replay icon on the interaction selector to display the time bar. Move the time bar to interact with the currently playing song.
- Touch TONE on the interaction selector to access the Tone Settings screen. Set the Bass, Midrange, Treble, Balance, and Fade.

USB Menu
Touch Menu to display the USB menu. The following may be available:
- **Shuffle**: Touch to play the tracks randomly. Touch again to stop shuffle.
- **Tone**: Touch + or − to adjust the tone settings. See AM-FM Radio 9.
- **Auto Volume (If Equipped)**: This feature adjusts the volume based on the vehicle speed. See AM-FM Radio 9.
- **Bose AudioPilot noise compensation technology (If Equipped)**: This feature adjusts the volume based on the noise in the vehicle and speed. See AM-FM Radio 9.

USB Browse Menu
Touch anywhere between the top and bottom menus or touch the BROWSE screen button to view the browse menu and the following options are displayed along the bottom of the screen:

**Playlists:**
1. Touch to view the playlists stored on the USB.
2. Select a playlist to view the list of all songs in that playlist.
3. Select a song from the list to begin playback.

**Artists:**
1. Touch to view the list of artists stored on the USB.
2. Select an artist name to view a list of all albums by the artist.
3. To select a song, touch All Songs or touch an album and then select a song from the list.

**Albums:**
1. Touch to view the albums on the USB.
2. Select the album to view a list of all songs on the album.
3. Select a song from the list to begin playback.
Songs:
1. Touch to display a list of all songs on the USB.
2. To begin playback, select a song from the list.

Genres:
1. Touch to view the genres on the USB.
2. Select a genre to view a list of all content of that genre.
3. Select artist to view a list of albums. Select an album to view a list of songs.
4. Select a song to start playback.

Podcasts, Composers, Audiobooks, Videos, and Folder View are shown when More is selected from the bottom of the screen.

Podcasts:
1. Touch to view the podcasts on the USB.
2. Select a podcast.
3. Select an episode to start playback.

Composers:
1. Touch to view the composers on the USB.
2. Select Composers to view a list of albums by that composer.
3. Select an album to view a list of songs.
4. Select a song from the list to begin playback.

Audiobooks:
1. Touch to view the audiobooks stored on the device.
2. Select the audiobook from the list. Select a chapter to begin playback.

Folder View (If Equipped):
1. Touch to view the directories on the USB.
2. Select a folder to view a list of all files.
3. Select a file from the list to begin playback.

File System and Naming
The songs, artists, albums, and genres are taken from the file’s song information and are only displayed if present. The radio displays the file name as the track name if the song information is not available.

When a list of songs, albums, artists, or other types of media displays, a vertical keyboard appears on one side of the list and a scroll bar on the other side. When using the vertical keyboard, touch the beginning character of the desired name to display the zoom bubble of that character. Remove the finger from the touch screen and the zoom bubble disappears.

Touch the scroll bar to move the list up and down.
18 Audio Players

Supported Apple® Devices
For more information, see your dealer.

Loss of Audio
If a phone currently paired over Bluetooth is plugged in with a USB cable, the system will automatically mute the phone audio. Playback can be resumed by changing the audio source from Bluetooth to USB cable.
Source USB from the Audio MEDIA screen button to resume playback.

Bluetooth Streaming Audio and Voice Recognition
See Bluetooth Audio for information on using voice recognition with Bluetooth streaming audio.

Make sure all devices have the latest software downloaded.

Auxiliary Jack
This vehicle has an auxiliary input jack in the centre console under the armrest. Possible auxiliary audio sources include:
- Laptop computer
- Audio music player
This jack is not an audio output. Do not plug headphones into the auxiliary input jack. Set up an auxiliary device while the vehicle is in P (Park).
Connect a 3.5 mm (1/8 in) cable from the auxiliary device to the auxiliary input jack. When a device is connected, the system can play audio from the device over the vehicle speakers.
If an auxiliary device has already been connected, but a different source is currently active, touch the MEDIA screen button to scroll through audio source screens, until the AUX Input source screen displays.

Playing from the AUX Port
An auxiliary device is played through the audio system and controlled through the device itself.

AUX Menu
Touch the MEDIA screen button to display the AUX Input menu and the following may display:

Tone Settings: Select to adjust Bass, Midrange, Treble, Balance, Fade, and EQ (Equaliser). See AM-FM Radio.

Auto Volume (If Equipped): This feature adjusts the volume based on the vehicle speed. See AM-FM Radio.

Bose AudioPilot noise compensation technology (If Equipped): This feature adjusts the volume based on the noise in the vehicle and speed. See AM-FM Radio.

DSP Modes (If Equipped): With a Bose surround sound system, this feature adjusts the DSP modes. See "DSP Modes" in AM-FM Radio.
Bluetooth Audio

If equipped, music may be played from a paired Bluetooth device. See Bluetooth (Overview) or Bluetooth (Infotainment Controls) for help pairing a device.

The music can be controlled by the infotainment controls or the controls on the device.

Music can be launched by pressing MEDIA on the faceplate or by touching the MEDIA icon on the Home Page.

To play music via Bluetooth:

1. Power on the device, and pair to connect the device.
2. Once paired, go into the audio application from the Home Page or through the applications tray. Select MEDIA until Bluetooth displays.

Bluetooth Audio Menu

Touch the MENU screen button to display the Bluetooth Audio menu. The following may be available:

Tone: Touch + or − to adjust the tone settings. See AM-FM Radio.

Auto Volume (If Equipped): This feature adjusts the volume based on the vehicle speed. See AM-FM Radio.

Bose AudioPilot noise compensation technology (If Equipped): This feature adjusts the volume based on the noise in the vehicle and speed. See AM-FM Radio.

Touch to go back to the previous menu.

Manage Bluetooth Devices: Touch to go to the Bluetooth page to add or delete devices.

When using the Bluetooth audio source, the radio may not be able to launch specific applications on your device. Use the device to start audio playback when it is safe to do so.

All devices launch audio differently. When selecting Bluetooth audio as a source, the radio may show as paused on the screen. Press play on the device or press to begin playback.

Some phones support sending Bluetooth music information to display on the radio. When the radio receives this information, it will check to see if any is available and display it. For more information about supported Bluetooth features, see www.gm.com/bluetooth.
20 OnStar System

OnStar System

OnStar 4G LTE

If equipped with OnStar 4G LTE, up to seven devices, such as smartphones, tablets, and laptops, can be connected to high-speed Internet through the vehicle's built-in Wi-Fi hotspot.

Call 1-888-4-ONSTAR (1-888-466-7827) to connect to an OnStar Advisor for assistance. See www.onstar.com for vehicle availability, details, and system limitations. Services and connectivity may vary by make, model, year, operator, availability, and conditions. 4G LTE service is available in select markets. 4G LTE performance is based on industry averages and vehicle systems design. Some services require a data plan.
Navigation

Using the Navigation System

Touch NAV on the Home Page or the Nav icon in the applications tray to access the navigation application.

Touch MENU from the map view to access the Navigation Menu. Features displayed in the Navigation Menu can be selected to adjust navigation preferences.

To exit out of a list, touch the Exit screen button in the top right corner of the map to return to the main map view.

When the screen is not in use, it will time out and remove the controls. Touch anywhere along the bottom or top of the screen to display the controls.

Additional navigation features are:

- Cancel Route/Resume To
- Navigation Voice Preferences
- Current Location
- Map View
- Routing Preferences
- Display “Places of Interest” Icons
- Personal Data

Cancel Route/Resume To

- While under route guidance, this screen button displays Cancel Route. Touch Cancel Route to cancel route guidance. No further prompts will be given. The list item then changes to Resume to.

- Touch the Resume to screen button to resume route guidance to the last entered destination.

- The last location that the system has provided guidance to can be resumed by touching on this list item.

- If the route includes waypoints, the entire route can be suspended using the Cancel Guidance list item. When Resume Guidance is touched, all waypoints are resumed for guidance.
22 Navigation

Navigation Voice Preferences

Touch the Navigation Voice Preferences list item to adjust the following voice preferences:

- Voice Prompts On-Off
- Voice Volume
- Prompts During Phone Calls On-Off

**Voice Prompts**

Touch the Voice Prompts list item to toggle voice prompts On and Off.

**Voice Volume**

Adjust the loudness of the audio feedback by touching − or +. If a manoeuvre prompt is being played, and the main volume is adjusted, the prompt volume will update and be saved.

**Prompts During Phone Calls**

When enabled, the system plays a shorter prompt while on a phone call. This setting can be configured as to whether a prompt would be heard during a phone conversation.

When this setting is Off, only the short alert tone is played when approaching the manoeuvre.

**Voice Prompts Mute Icon**

Touch the Mute icon on the left side of the map while in mapview to turn voice prompts On or Off.

Current Location

Touch the Current Location list item to display a Current Location list.

The following information is displayed on the Current Location list:

- Nearest Address
- Lat/Long
- Nearest Hospital
- Nearest Police
- Nearest Fuel
- Nearest Service

Touch any of the options to display the destination details view for the selected location to begin guidance.
Touch the Nearest Address button and then the Save screen button to store the current location to the Address Book.

**Map View**

Touch to select the desired map view.

A checkmark appears to indicate a view has been selected.

**3D View**: The 3D View is a Heading Up view but it includes perspective. Map items will appear larger as the vehicle comes closer.

**Heading Up View**: The Heading Up View keeps the vehicle’s current heading at the top of the view. The vehicle icon always faces the top of the view as the map rotates.

**North Up View**: The North Up View keeps north at the top of the view. The vehicle icon is placed in the centre of the view and rotates to indicate the heading for the vehicle.

**Audio Information On/Off**: Touch to turn the audio information view on or off from the main map view.

The audio status screen contains:
- Station Frequency
- Artist Information
- Song Information
- ▶/⏸ or ◀ or ▶▶ Station and Channel Controls

Touch the ◀ or ▶▶ Station controls to go to the next or previous strong signal station or digital channel.

When the audio status pane displays Artist and Song Information, touch ◀ or ▶ to go to the next or previous track based on the current media mode.

**Day/Night Mode**

Touch to access the Day/Night Mode menu.

The options are:
- Day Mode: Brightens the map background.
- Night Mode: Darkens the map background.
- Auto: Adjusts the screen background automatically depending on the exterior lighting conditions.

**3D Buildings On/Off**: When 3D building information is available for a particular area, the icons are shown at a zoomed level. If the current vehicle position would be hidden by another building, the building is shown as see through so
24 Navigation

the vehicle icon is visible. Touch to turn the 3D Buildings feature On or Off.

Autozoom On/Off: At certain zoom levels, street detail is removed to keep the view uncluttered. Touch to turn the Autozoom feature On or Off.

Routing Preferences
Touch the Routing Preferences list item to access the Routing Preferences menu. Options on how the routes are created for route guidance are listed on this menu.

Route Style
Touch this list item to change the route type preferences.
The options are:
- Fast (default)
- Eco Friendly (if equipped)
- Short
- Configure Eco Profile

The Configure Eco Profile can be used to configure two parameters for the Eco Friendly route. These parameters are roof load and trailer.

For each parameter, the options are None, Small, Medium, and Large. Touch to scroll through the list. The default for both is None.

These preferences are used for all routes generated.

Display Places of Interest Icons
Places of Interest (POI) icons can be displayed on the map using this view.

- The POI icons can be turned On and Off. Touch the check box next to the POI icon to display the icon.
- Touch Clear All to reset the icons that are displayed on the map.
- A subcategory can be selected instead of the entire category. Touch the list item itself rather than the check box. The subcategories will display. Select any of those categories to navigate down the hierarchy.

Route segment preferences are other options showing on the Routing Preferences menu.

These include:
- Use Toll Roads On/Off
- Use Motorways On/Off
- Use Carpool Lanes On/Off
- Avoid Slow Traffic On/Off
- Use Tunnels On/Off
- Use Time Restricted Roads On/Off
When a higher-level category has some of its subcategories selected, the checkmark next to it is greyed out. This indicates that only some of the categories below are shown. Touch the greyed-out checkmark to turn all of the icons for that category on or off.

**Personal Data**

Data that the system has saved during the course of using the navigation system can be managed through:

- Contacts
- Recent Destinations
- My POIs (if equipped)

**Upload Saved Locations**

**Delete Autocomplete**

**Contacts**

1. Touch Delete All Entries to delete the entire list of contacts. A pop-up displays to confirm.
2. Touch Edit Contacts List to display the Contacts to edit.

**Recent Destinations**

- Touch Delete Individual Destinations to display a recent destinations list. Select the individual entry to delete.
- Touch Delete All Destinations to delete the entire recent destination list. A pop-up displays asking to confirm the deletion.

**My POIs**

- Touch My POIs to display a menu of other options.
- Select Delete Individual Categories. A My POIs category list displays.

**Select the individual entry to delete.**

**Touch Delete All My POIs to delete the entire list of categories. A pop-up displays asking to confirm the deletion.**

**Upload Saved Locations**

- Touch Upload Saved Locations to save the Vehicle Contacts list and any MyPOIs that have been saved to the vehicle.
- Once saved locations have been uploaded to a USB, they can be transferred to a different vehicle or restored to the current contacts list.

**Delete Autocomplete**

Touch the Delete screen button on the Delete Autocomplete History menu to clear personal data from the keyboard.
26 Navigation

A pop-up displays a message to confirm deletion of all keyboard autocomplete history. When Delete is touched, the system clears all navigation addresses, POIs, etc. The autocomplete will not delete recent destinations. Touch Cancel to stop the process.

Map Adjustments

ZOOM −/+ can be used to adjust the scale of view on the map. When the end of the zoom level is reached, ZOOM −/+ will grey out.

The zoom scales can be configured for English or metric units. To change from English to metric, see "Instrument Cluster" in the owner manual.

Scroll Features

- To scroll within the map, touch anywhere on the map screen.
- Nudge or slide a finger on the map; the map moves in the direction of the finger.
- Fling a finger on the map; the map will start scrolling in a short continuous scroll.
- Touch the location on the map; the map re-centres to the location that was touched.
- Touch a location on the map; the map zooms in one level to the location that was touched twice.
- When the map is recentred away from being locked to the vehicle position, the crosshairs will show in the centre of the map. As the map continues to be recentred, the crosshairs will remain on the screen. When the crosshairs are shown on the screen, a callout with more information displays. If the map is moved from the current location, the crosshairs will disappear along with the callout.
- Touch the callout next to the crosshairs and the destination details view displays. From this view, route guidance can be received or saved to the vehicle's contact list.
- When the map is recentred, the straight-line distance from the vehicle to the selected point is displayed in the callout. In addition, a heading direction in the form of an arrow is displayed to indicate the direction. The arrow is shown in relation to the current vehicle heading.
- Touch a POI icon on the map; the name of the POI is shown in the address callout, along with the city name and state. If the
callout is selected, the destination details view for the POI is shown.

- After panning the map away from the vehicle, touch RESET to return the map back to the current position.
- Touch the Overview button to quickly get a view of the entire route. The route Overview button takes the place of the RESET button while under route guidance. Touch RESET to return the map to the current position.

Maps

The map database is stored in the internal flash memory that is used in the navigation system.

Detailed Areas

Road network attributes are contained in the map database for detailed areas. Attributes include information such as street names, street addresses, and turn restrictions. A detailed area includes all major motorways, service roads, and residential roads. The detailed areas include Places of Interest (POIs) such as restaurants, airports, banks, hospitals, police stations, petrol stations, tourist attractions, and historical monuments. The map database may not include data for newly constructed areas or map database corrections that are completed after production. The navigation system provides full route guidance in the detailed map areas.

Navigation Symbols

Following are the most common symbols that appear on a map screen.

The vehicle symbol indicates the current position and heading direction of the vehicle on the map. When under route guidance, a circle with an arrow is added to the vehicle symbol which indicates the direction to the destination.

Vehicle Address Callout

Tap on the vehicle icon, to have the current address of the vehicle overlaid on the map next to the vehicle icon in a callout. Another tap hides the information.

Any address information about the vehicle’s current location will be shown, including the street, city, and state names.

Tap on this callout to save the current address to the vehicle address book.
28 Navigation

The destination symbol marks the final destination after a route has been planned.

The estimated time to the destination displays. Touch the Arrival button to toggle between duration and distance to the destination.

The waypoint symbol marks one or more set waypoints. A waypoint is a stopover destination point added to the planned route.

This symbol indicates the recommended manoeuvre that should be performed. Touch it to display the turn list or waypoint list.

The No GPS symbol appears when there is no Global Positioning System (GPS) satellite signal. When the GPS is gone, the vehicle position on the map may not be accurate.

Autozoom
As a manoeuvre is being approached, the map automatically zooms in to give greater detail.

If lane guidance is available for the manoeuvre, this is also shown.

When the system begins to autozoom, it zooms in to its minimum level. After the manoeuvre is performed, the system slowly zooms back out.

Destination
If route guidance is not active, touch NAV on the Home Page to access the map view. Touch the Destination icon from the map view to enter a destination. Available methods of entering a destination are Voice Recognition, Address, Recent Destination, Contacts, and POIs. Several options can be selected to plan a route. Some destination items may be greyed out if no destination was previously entered or saved.
Touch the DESTINATION button to go to the destination entry views.

**Available Methods of Search**
- Address (entries by hierarchy)
- Intersection
- Places of interest (POIs)
- Recent (destinations)
- Contacts

Touch the DESTINATION button and the last used destination view is shown. This mode is retained. The initial default is Address.

**Navigation Next Turn Manoeuvre Alert**

The navigation system may need to get the attention of the driver in certain situations.

If not in the navigation application when a near manoeuvre prompt is given, it is shown as an alert. The alert contains the turn indicator and button to display the main navigation view, or dismiss the alert.

The alert also contains the name of the street to turn on and a countdown bar.

**Auto-Capitalisation**

The shift key is automatically enabled when a full stop is entered on the keyboard. Once the first character is typed after the full stop, the next character will change to lower-case.

**Alpha-Numeric Keyboard**

The keyboard is used in multiple locations throughout the system and can be used with many features. The navigation system uses the keyboard's alpha-numeric keyboard. The keyboard can also be modified to include characters appropriate for the region configured in the vehicle settings.

✓ : Touch to search for the destination details of an address or place of interest entered in the text field. Once ✓ is touched, the activity indicator displays in the list of possible matches.

▽ : Touch to display a list of matches.

When there are multiple matches, a dropdown arrow is shown after the autocomplete text. This dropdown displays an entire list of matches. Touch the appropriate match without having to enter more text.

× : Touch to delete the last typed character. Touch and hold this screen button to clear the entire text field. If the entire text field has been deleted, this screen button becomes an Undo button. Touching Undo will restore the deleted text.

Exit : Touch to return to the previous Map view.

SYM : Touch to show the symbol keyboard.
30 Navigation

SPACE: Touch to enter a space between characters or the words of a name.

: Touch to display the interaction selector.

: If equipped, touch to switch between Alpha-Numeric Keyboard and Character Recognition.

Special Characters

As the characters are typed on the keyboard, a pop-up of the letter touched displays above the key that was touched.

Continue to touch and hold, and any additional special characters associated with that letter are displayed around the current letter. To select one of the special characters, slide a finger left or right to adjust the highlight of the special character.

Special Character List

The following characters have special characters beneath them:

<table>
<thead>
<tr>
<th>Special Characters</th>
<th>More Characters:</th>
</tr>
</thead>
<tbody>
<tr>

</table>

Character Handwriting Recognition

Character handwriting recognition is offered as an alternative to using a keyboard. This character input method allows the drawing out of characters instead of picking them out from the keyboard. Character handwriting recognition has two main modes, Upper Case and Mixed Case. The Upper Case mode is used for Destination Entry while Mixed Case is used for all other character entry modes. This feature is available by touching the globe button from the keyboard screen.

The Handwriting Recognition screen is split into different zones:

- **Drawing Pad**: This is the area to draw a character. Draw a character in the display area.

  When the first character is complete, a representation of that character can be seen, and there is an audible response. If the character is correct, the next character can be started immediately.

  - To delete the last entered character, draw a line from left to right across the character field.
  
  - To create a space, draw a line from right to left across the character field.

- **Prioritised Guess List**: This area displays a list of guesses for the character drawn. If character recognition displays the incorrect character, look at this list and see if the desired character is available to select. Scroll up or down the list, then highlight the desired character. Selecting a character from the list will replace the incorrect character with the desired
character. The character is displayed in the character entry section of the screen.

- **Character Entry**: This is the area across the top of the screen. This section can look different depending on which feature is being used.

**Option Settings**

This section is an area on the right-hand side of the Character Recognition screen. This section will only look different if the characters displayed on the screen are in upper case or mixed case.

- : Select from the touch screen. The draw speed setting will adjust the speed of the character recognition feature. The settings are: Faster, Default, and Slower.

- **Audio Feedback**: Touch to turn Audio Feedback On or Off. Audio feedback is an audible response to an action that has occurred while using the Character Recognition.

- **ABC/abc**: Select from the touch screen to view the available character sets. Select a character set to change. Multiple character sets may not be supported by some regions. This button also displays the sentence case of upper or lower case characters that are currently active in a mixed case mode. If only one character set is available for the desired region, touching the character recognition will only open and close the character recognition window.

  If mixed case character mode is supported, the last buttons of character recognition will be upper and lower case.

**Search Process**

The process of prioritising the search is to help shorten the length of time at finding the results. If there is a 100% match found when a search type is carried out, the remaining searches abort.

The system conducts the search in the following order:

1. Vehicle Contacts List
2. Connected Phone Contacts List
3. POIs
4. Addresses

The Contacts are done first because the list will be relatively short and can be done quickly.

POIs are done next because the amount of time it takes to search for the average POI is consistent. The less deviation during a search would mean an average of less time taken.

The Addresses are last because the standard deviation for an address search is very large. Some address searches are very quick, but others may take a very long time. Because

**One-Shot Search**

Enter a full or partial Address, Contact, or POI into the search bar and the system will search and display all of the matches.

The contacts that are searched include both the connected phone's contacts list and the vehicle's contacts list.
32 Navigation

of this, the address search would not be conducted unless a good match could not be found in either Contacts or POIs.

Autocomplete
The autocomplete is preloaded with all recent destinations and POI category names. Previous POI name searches are remembered.

If only one type of result is found, the single type result screen is shown. Within each group, they are listed in confidence order. This means the highest confidence result will be at the top.

If multiple types of matches are found, the result list with the highest confidence match displays.

Address and Contact matches are shown in full width list format. The match results will display unique icons for full addresses, streets, intersections, cities, states, and countries.

POIs show in a split list format with the map on the right displaying the locations of the matches. The brand icon or category icon will display for the match results.

When a list displays, the results for a particular type can be filtered by touching the filter buttons along the top of the screen. If there are no particular results for a selected type, a message is indicated in the list.

For example:
- For no addresses: “No Addresses Found Within <state/region>”
- For no POIs: “No POIs Found Within<75 km/50 mi/800 km/500 mi>.” This distance is shown depending on what radius is completed and what current units are selected.
- For no contacts: “No Contacts Found.”

The system performs partial searches on contacts, so typing a first name or last name would find a match. The entire contact name does not need to be entered for it to be found in a search.

Touching a contact listed on the results list displays the standard contact details view to select an item, such as an address to start routing, or a phone number to place a call.

Address

![Address Entry](image)

- A destination can be searched by typing out the address, intersection, highway, or motorway entrance ramps on the keyboard. This information is typed and displayed in the information field. Touch the Search icon to start the search.
For example:

**City:** Crawford  
**Street:** Main Rd  
**House #:** 12334

- Country information does not have to be included in the search field if entering an address that is located in the same state.
- Whenever the keyboard view is entered, the last text that was typed, even if it was not searched on, will display.
- A partial or complete address can be typed in the search field. If a partial address is typed, the system attempts to use local knowledge to fill in additional information. For example, if no city name or state are given, the system assumes a search for something in the current city or a nearby city in the current country. The system is also capable of recognising address formats according to other regions.

If a destination address or location being entered is outside of the country, the country abbreviation must be added after the address.

**Spelling Mistakes**  
The system is able to offer alternatives if the searched term is not found exactly. The system uses the closest term it finds and provides those results.

The system first searches the entered term exactly. If no matches are found, partial words are used.

**Search in Process**  
Touch the Search icon, and the results screen displays with the activity indicator. There is a non-selectable List item in the list that says “Searching” to indicate that it is in process.

Once the results are found, the correct list screen will display.

**No Results Found**  
If no results are found from an entered search term, a pop-up displays indicating there are no results found. Touch the OK screen button to return to the keyboard view.

**Results Display**  
If only a single match is found at the end of a search, the list is not shown but the Destination Details view is shown. Touch Back from the Destination Details view to go back to the results list screen. If it was a POI search, the Continue POI Search icon is available in case that was not the desired POI.

**Places of Interest (POI)**  
While at the Home Page, touch the NAV icon to display a view of the map. Touch the DESTINATION screen button to go to the destination entry views.
34 Navigation

1. Touch the POIs screen button to display a list of POI categories.

The first list item in every POI list is a search function. For the highest level of categories, touch the Spell Name screen button or select a category and search within that selection.

2. Select a POI category to display subcategories.

3. If a selected subcategory has no results in the surrounding area, the search is expanded until a result is found.

4. If a high-level category is selected, such as restaurants, the map zooms in to the region near the vehicle’s position to show the nearest matches.

When a list displays, it can be filtered for a particular type by touching the filter button along the top of the screen. If there are no particular results for a selected filter type, it is indicated in the list.

5. Pan or zoom the map using the finger gestures to minimise the POI list and to interact with the map. The icons that were shown before continue to be displayed and updated. The list is also updated based on where the map was panned or zoomed. The search for POIs is constrained to where the map has been moved to.

6. If the search map is touched to recentre, the crosshairs are shown to indicate the centre of the new search location. If a POI icon is touched on while in the full expanded map, a callout for that location is displayed. Touch the callout to display the destination details view.

7. Touch the map reset button to return the map to automatic zooming and searching. It is recentred around the vehicle’s position, the route, the destination, or another location that was specified for the search. The map RESET button is only displayed if the map was manually adjusted.

If multiple types of matches are found, the All list is shown with the results sorted by confidence order with the highest confidence result at the top.

Using the Keyboard

The POI can be searched by entering a POI name, category, name and category, or phone number on the keyboard.
Navigation

For example, enter the information as:

**POI Name:** Worldwide Food  
**POI Category:** Restaurants  
**POI Name and Category:** Worldwide Food Restaurants  
**POI Phone Number:** 0001222555

Additionally, a location may be entered if the POI is not nearby. This search will then be made around the location that is given. For example, enter the information as:

**POI Name and Location:** Worldwide Food Chicago IL

The POI keyboard search results will display in the order in which they were found.

**POI Search Location**

If browsing for POIs or searching for results on a keyboard in a different location than what was searched previously, touch the Search Options button on the map view to specify a different location.

Touch an option displayed on the Select Search Area menu.

- **POIs Along Route**
- **POIs Nearby**
- **POIs Near Destination**
- **POIs at Another Location**

**Favourite POIs**

Locations, categories, or a particular POI chain ID can be saved as Favourites in the POIs view.

Tap on the ‼️ up arrow to reveal the interaction selector, then drag up on it to reveal the Favourites locations.

Touch and hold on a favourite location, then touch on the category to be saved. Whenever a set of POIs is grouped, such as in a category, the whole category is saved in the favourites for recall. Whenever a set of POIs that belong to the same chain ID is saved in the favourites, a POI chain saving pop-up message displays asking to save only that location, or to save the entire chain. POIs are only grouped by chain when the sorting order is Alphabetical. Touch the Sort button to change the sorting order.

**Recalling a POI Category or Chain**

If a POI category or chain favourite is recalled, the system displays a list of matching results defaulting to nearby, but allows a search of other locations. Touch the Search Options button to specify a different location.
Creating and Downloading Predefined POIs (My POIs)
In addition to the POIs already stored in the infotainment system, predefined POIs can be created.

While creating a predefined POI, the GPS coordinates for longitude and latitude of the POI's location and a descriptive name will need to be entered.

After creating the predefined POIs, they can be downloaded to the infotainment system from a USB device.

Once downloaded, the POI data becomes a selectable destination in the My POIs menu.

Creating a Text File with Information
Create a text file by using a simple text editor software. Save this file with a name and extension of .csv, for example, “TomsPOIs.csv.”

Enter the POI information into the text file in the following format:
- Longitude coordinate, Latitude coordinate, "Name of POI", "Additional information", "Phone number."
  Example: 7.0350000, 50.6318040, "Michaels Home", "123 Maple Lane", "02379234567."
- The GPS coordinates must be expressed in decimal degrees and can be taken from a geographical map. The additional information and phone number strings are optional.
- The POI name and the additional information string may not exceed 60 characters.
- POI information for each destination address must be entered in a single separate line.

Storing the POI on a USB Drive
In the root directory of a USB device, create a folder name “myPOIs,” for example, “F:\myPOIs\TomsPOIs.csv.”

In the “myPOIs” folder, store the text file with your POIs, for example, “F:\myPOIs\TomsPOIs.csv.”

Downloading the POI to the Infotainment System
Connect the USB device containing the POI information to the USB port of the infotainment system. A message displays prompting whether or not to download the POI information from the USB device. All POIs found are saved even if they are in multiple folders.

Subfolders can also be created to organise the POIs into categories, for example, “F:\myPOIs\Restaurants\TomsPOIs.csv.”

If the message is dismissed or ignored, no POI information is downloaded. This prompt will not recur for the current ignition cycle.

When the system is finished downloading, a pop-up displays asking to specify a category for the new POIs, if desired.
Importing and Overwriting Categories

When POIs are found on a media device, the date of the file is examined and compared to the date for the files already in the system. If the file being downloaded is newer than the one on the system, that particular category of POIs is overwritten. Any other POIs that had previously been saved in other categories are not affected.

Address Book Download

If an Address Book is found on the connected USB device, the same alert is used to indicate that locations have been found and they can be downloaded. If there is already content in the vehicle Address Book, the system prompts if the stored content should be overwritten. Select Save to overwrite the existing Address Book information. Select Cancel to abort the import of information.

Browsing Downloaded POIs

Access the downloaded POIs by selecting the My POIs list item in the POIs list.

Editing My POIs

Downloaded POIs can be edited at a category level. These POIs can either be deleted as an entire category or be reassigned as another category. To edit the categories:

- Select the Edit button at the main category view to edit the POIs. Edit buttons display next to each category name. There is no POI browsing in this mode. Only edit functions are available.
- Once an action such as deleting or reassigning has been selected, the changes are saved immediately.

Changing POI Categories:

POI categories can be assigned to a different category by using the same method as assigning a category for an Address Book entry. When editing, the right side of the infotainment displays the current category name.

Deleting POI Categories

POI categories can be deleted by selecting Edit and then Delete. A pop-up displays to confirm the deletion.

Saved Destinations

Select a saved destination from the Contacts or Recent Destinations.

Contacts

Select the CONTACTS screen button to view the vehicle’s contact list or a connected Bluetooth device. If a particular contact has a single address associated with it, that contact has a Quick Route list item function button next to it. Contacts without this Quick Route button either have multiple addresses or no address at all. Touch the Quick Route button to go to the Destination Details view.

Touch on an address, either from the Quick Route on the contact list or a specific address from the
38 Navigation

contact detail list, to go to the destination view showing that address on the map.

Trips from Contacts can be saved and recalled. The order is based on when the trip was last used. When the trips are saved, they are given a default title of the final destination name. If there are no saved trips, this list item is hidden.

Adding a New Contact
When creating a new contact, the navigation system automatically saves all data from the selected location into a new contact.

The information saved will store as:
- Location Name saved as First Name
- Phone Number saved as Work
- Address saved as Work
- POI Information saved as Notes
- Category saved in Category Field

After touching the Create New Contact screen button, the newly created contact is then displayed.

Favourite Destinations
- Destinations can be saved as Favourites for recall later. Depending on the favourite, when an address or POI favourite is recalled, the Destination Details View is shown.
- When a favourite address is being routed to, it is shown active. Touch on the active favourite, to suspend that route.
- Save locations as Favourites for recall later in the Destination Details View.
- Save trips from the Address Book.

Storing Favourites from the Contact Details List
A contact name or any of the contact’s information such as phone number or address from Contact Details can be stored as a Favourite.
- Touch and hold on the favourite location while viewing a contact on the Contact Details List. The contact name and all contact information can be stored.
- Touch to save as a favourite. The favourite label will be the name of the contact.
- Touch on the Favourite to display the destination view.

Storing Favourites from Map
Favourite locations can be stored from the Map View.
If not under route guidance, the current vehicle location will be saved as a Favourite. If under route guidance, the final destination will be saved.

Touch and drag up on the row of interaction selector buttons to reveal the Favourite buttons. Touch and hold on the favourite location from the Map View to save it.

**Route Guidance**

- Touch Go to go to the main navigation view and to start route guidance.
- If the system has an active route, a pop-up will display, “What would you like to do with this destination?” The options are: Add As Waypoint, Set New Destination, or Cancel.
- If a waypoint is added, it is placed in the location that leads to the most efficient route.
- There is a maximum number of waypoints that can be added to the system. When the maximum number of waypoints has been reached, a pop-up displays indicating that a waypoint must first be deleted before a new one can be added. The system will hold this waypoint into a Pending Waypoints list and it will automatically be added to the route once a position is available, either by arriving at a waypoint, or by deleting one.
- To save a location, tap on the \( \rightarrow \) to display the Favourite buttons. Touch and hold on a favourite location to save the shown location as a Favourite.

**Estimated Time of Arrival (ETA) and Distance**

- When under route guidance, the system shows the ETA or travel time, or the driving distance.
- The ETA and travel time are calculated using any available traffic information.
- If in a waypoint trip, the ETA, travel time, and driving distance are all shown relative to the final destination.
- The final ETA is shown taking into consideration any time zone crossings that the route has travelled through.
- Touch the ETA information area to switch between the estimated arrival time, total driving time resulting, and driving distance.

**Current Street Name**

The current street name that the vehicle is driving on is displayed along the bottom centre of the display.
40 Navigation

When driving off-road or on an unknown road, “Off Road Location” displays.

**City Lane Guidance**

When a manoeuvre is approached that has city lane guidance information, it replaces the normal manoeuvre indicator.

The arrows will expand toward the centre of the screen so that the manoeuvres can be identified in an easier way.

**Highway Lane Guidance**

The junction view image displays on the right edge of the screen and temporarily covers the Distance information. The current vehicle position and street name is moved left and centred in the available map display when this is displayed.

**Off-Road Mode**

When the vehicle is off-road, the system displays the off-road arrow in the turn indicator and displays “Off Road Location” in the street name field.

**Destination Arrival**

The route review information displays in the turn indicator location and the destination address displays in the street name field.

**Audio Information**

The audio information remains in the same position in the lower right corner of the display.

The current street name information remains in the same location, but will truncate if needed.

**Turn List**

Touch on the next turn indicator shown on the map to display the turn list or waypoint list. The interaction selector is minimised automatically. Touch 🔄 to reveal the following options:

**Destination**

Touch the Destination screen button to add a waypoint or change the destination while viewing the turn list. When the Destination screen button is touched, the display shows the Destination screens.

**End Guidance**

Touch the End Guidance screen button to suspend the current route in the turn list. When the End
Guidance screen button is touched, the turn list is exited and the display returns to the main map view.

**Avoid Areas**

Touch the Avoid Areas screen button to select the motorway name that is to be avoided. The system shows a pop-up asking how many miles or if the entire road should be avoided.

**Turn List**

- When under a waypoint trip, touch on the Turn List interaction selector button to show the turn list. When entering a turn list, the next manoeuvre instruction is spoken.
- The turn list title is the name or address of the destination. Touch on the information button next to the name of the destination to display the destination information.
- The turn list is sorted in order with the next manoeuvre at the top of the list and the subsequent manoeuvres listed below it. The next manoeuvre is always highlighted upon entry into the Turn List to quickly show what the next manoeuvre is.
- Each manoeuvre indicates the distance between it and the previous manoeuvre or the vehicle's current location. The next manoeuvre at the top will count down until the manoeuvre is reached, and then the next manoeuvre will begin to count down.
- Each manoeuvre has an estimated time of arrival based on the current driving conditions.

**Saved Trips**

Waypoint trips can be saved for later recall. Touch the Add button in the waypoints list to save the trip to the Saved Trips list in the vehicle's contacts list. When trips are saved, they are given a default title of the final destination. Saved trips can be edited by selecting the Edit list item button to access the edit screen for the saved entry. The only field that can be edited is the name field. Touch on the name field to access the keyboard view. Type the name change. This change is automatically saved when executed by the keyboard.

The saved trip can also be deleted from the edit mode. Touch the delete button and a delete confirmation pop-up will display.
**42 Navigation**

**Waypoints**

- When under a waypoint trip, touch on the next turn indicator to bring up the waypoint list. The last waypoint view is shown, which could be Waypoints, Turn List, or Edit Route.
- The waypoint list is sorted in order with the next waypoint at the top of the list. Each waypoint is indicated with a numbered icon, starting with the next waypoint.
- To indicate what segment of the route is for the next waypoint, and what is for the remainder of the route, they appear in different colours.

**Optimised Route**

- Touch the Optimise screen button to optimise the current waypoint trip.
- The optimisation is done according to how the preferences are set for new routes, for example, fastest route, shortest distance, or eco friendly.
- While the system is optimising the route, the waypoint trip has the Activity Indicator displayed over the top of it. If the system is calculating the ETA and travel distance for a waypoint, the Activity Indicator is displayed in the list header.
- When either a waypoint trip is first created, or additional waypoints are added to an existing waypoint trip, they are added in the location that would lead to an optimised route.
- If a destination is already planned and a waypoint is added, it is either added before or after the current destination, whichever leads to the most optimal route.
- If under an existing waypoint trip consisting of two or more destinations, any additional waypoints are added in the location that would lead to the most optimal route.

**Edit Route**

- Touch the Edit Route screen button to modify the order or remove a waypoint from the route. Touch the delete screen button to remove a waypoint from the route.
- A pop-up displays asking for confirmation of the waypoint deletion.

**OnStar® System**

With an OnStar subscription to the Guidance Plan, an OnStar Advisor can download a destination to the vehicle or into the built-in navigation system. If an OnStar Turn-by-Turn route is in progress, all other
internal navigation functions are disabled until the route is completed.

When navigation is selected, the OnStar Turn-by-Turn screens display.

**Turn-by-Turn Navigation**

Touch the MENU screen button to go to the Turn-by-Turn Menu.

The following options display:
- Plan Route (if the vehicle is off the route)
- Cancel

**Plan Route**

Select My Destination to display a special version of the Manoeuvre View. The Destination Address is displayed in the Street Name and the total distance to the destination is displayed in the Distance to Manoeuvre View. Touch the Done button to return to the Manoeuvre View.

**Cancel a Route**

If a route is in progress using either the vehicle navigation system or the OnStar Turn-by-Turn route, and a new route is requested, the current route in progress will be cancelled.

An OnStar Advisor can cancel the vehicle navigation system route. Route guidance can be resumed by selecting the Resume to screen button in the Map Menu.

**Global Positioning System (GPS)**

The position of the vehicle is determined by using satellite signals, various vehicle signals, and map data.

At times, other interference such as the satellite condition, road configuration, condition of the vehicle, and/or other circumstances can affect the navigation system’s ability to determine the accurate position of the vehicle.

The GPS shows the current position of the vehicle using signals sent by GPS satellites. When the vehicle is not receiving signals from the satellites, a symbol appears on the map screen. See Navigation Symbols 27.

This system might not be available or interference can occur if any of the following are true:
- Signals are obstructed by tall buildings, trees, large trucks, or a tunnel.
- Satellites are being repaired or improved.

For more information if the GPS is not functioning properly, see Problems with Route Guidance 44 and If the System Needs Service 45.

**Vehicle Positioning**

At times, the position of the vehicle on the map could be inaccurate due to one or more of the following reasons:
- The road system has changed.
- The vehicle is driving on slippery road surfaces such as sand, gravel, or snow.
44 Navigation

- The vehicle is travelling on winding roads or long straight roads.
- The vehicle is approaching a tall building or a large vehicle.
- The surface streets run parallel to a freeway.
- The vehicle has been transferred by a vehicle carrier or a ferry.
- The current position calibration is set incorrectly.
- The vehicle is travelling at high speed.
- The vehicle changes directions more than once, or the vehicle is turning on a turn table in a car park.
- The vehicle is entering and/or exiting a car park, garage, or a car park with a roof.
- The GPS signal is not received.
- A roof carrier is installed on the vehicle.
- Tyre chains have been installed.
- The tyres are replaced or worn.
- The tyre pressure is incorrect.
- This is the first navigation use after the map data is updated.
- The 12-volt battery is disconnected for several days.
- The vehicle is driving in heavy traffic where driving is at low speeds, and the vehicle is stopped and started repeatedly.
- Plural names of places might be announced occasionally.
- It could take a long time to operate automatic rerouting during high-speed driving.
- Automatic rerouting might display a route returning to the set waypoint if heading for a destination without passing through a set waypoint.
- The route prohibits the entry of a vehicle due to a regulation by time or season or any other regulation which may be given.
- Some routes might not be searched.
- The route to the destination might not be shown if there are new roads, if roads have recently changed, or if certain roads are not listed in the map data. See Maps 27.

Problems with Route Guidance

Inappropriate route guidance can occur under one or more of the following conditions:

- The turn was not made on the road indicated.
- Route guidance might not be available when using automatic rerouting for the next right or left turn.
- The route might not be changed when using automatic rerouting.
- There is no route guidance when turning at an intersection.

To recalibrate the vehicle’s position on the map, park with the vehicle running for two to five minutes, until the vehicle position updates. Make sure the vehicle is parked in a
location that is safe and has a clear view of the sky and away from large obstructions.

**If the System Needs Service**

If the navigation system needs service and the steps listed here have been followed but there are still problems, see *Problems with Route Guidance* ☛ 44.

**Map Data Updates**

The map data in the vehicle is the most up-to-date information available when the vehicle was produced. The map data is updated periodically, provided that the map information has changed.

For questions about the operation of the navigation system or the update process, contact your dealership.

**Database Coverage Explanations**

Coverage areas vary with respect to the level of map detail available for any given area. Some areas feature greater levels of detail than others. If this happens, it does not mean there is a problem with the system. As the map data is updated, more detail can become available for areas that previously had limited detail. See *Map Data Updates* ☛ 45.
46 Voice Recognition

Voice Recognition
Voice recognition allows for hands-free operation within the navigation, audio, phone, and weather applications. This feature can be started by pressing \( \text{\( \text{\( g \)}} \) on the steering wheel controls or by touching \( \text{\( \text{\( g \)}} \) on the infotainment display.

However, not all features within these areas are supported by voice commands. Generally, only complex tasks that require multiple manual interactions to complete are supported by voice commands.

For example, tasks that take more than one or two button presses such as selecting a song or artist to play from a media device would be supported by voice commands. Other tasks, like adjusting the volume or seeking up or down are audio features that are easily performed by pressing one or two buttons, and are not supported by voice commands.

In general there are flexible ways to speak commands for completing the tasks. Most of them, except destination entry and voice keypad, can be completed in a single command. If the task takes more than one command to complete, the first command should be to indicate the kind of task to be performed, like “Navigation Destination Entry.” The system replies with prompts that lead you through a dialogue to enter the necessary information. For example, if a destination for route guidance is needed, say “Navigation” or “Destination Entry.”

If your language supports it, try stating a One-Shot command, such as “Navigate to Address one two three Main Street, Lansing Michigan.” This type of destination entry command is supported in some languages. Another example of a One-Shot Destination Entry command is, “Navigate to Place of Interest – Hotels.” If these commands do not work, try saying, “Navigate to Place of Interest” or “Navigate to Address” and the system will do the rest.

Voice recognition can be used when the ignition is on or when Retained Accessory Power (RAP) is active. See “Retained Accessory Power (RAP)” in the owner manual.

Using Voice Recognition
Voice recognition becomes available once the system has been initialised. This begins when the ignition is turned on. Initialisation may take a few moments.

1. Press \( \text{\( \text{\( g \)}} \) on the steering wheel controls to activate voice recognition, or touch \( \text{\( \text{\( g \)}} \) on the infotainment display.

2. The audio system mutes and the system plays a prompt followed by a beep.

3. Wait until after the beep completes, then clearly speak one of the commands described in this section.

Press \( \text{\( \text{\( g \)}} \) to interrupt any voice recognition system prompt. For example, if the prompt seems
Voice Recognition

If a command is not spoken, the voice recognition system says a help prompt.

Prompts and Infotainment Displays

While a voice recognition session is active, there will be corresponding buttons on screens displayed. Manual interaction in the voice recognition session is permitted. Interaction during a voice session may be completed entirely using voice commands, or some selections may expedite a session. If a selection is made using a manual control, the dialogue will progress in the same way as if the selection was made through a voice command. Once the system is able to complete the task, or the session is terminated, the voice recognition dialogue stops.

An example of this type of manual intervention is touching on an entry of a displayed number list instead of speaking the number associated with the entry desired.

Cancelling Voice Recognition

- Touch the Home screen button. Touching this button will terminate a voice recognition session which was initiated by touching the button on the infotainment display.
- Touch or say “Cancel” or “Exit” to terminate the voice recognition session and display the screen from which voice recognition was initiated.
- Press on the steering wheel controls to terminate the voice session and display the screen from which voice recognition was initiated.

Helpful Hints for Speaking Commands

Voice recognition can understand commands that are either naturally stated in sentence form, or direct commands that state the application and the task.

Most languages do not support natural language commands in sentence form. For those languages, use direct commands like the examples shown on the display.

For best results:

- Listen for the prompt and wait for the beep before saying a command or reply.
- Say “Help” or look at the infotainment display for example commands.
48 Voice Recognition

- A voice recognition system prompt can be interrupted while it is playing by pressing `g`.

  For example, if the prompt seems to be taking too long to finish, to speak the command without waiting for the prompt to complete, press `g`.

- Speak the command naturally, not too fast, not too slow. Use direct commands without a lot of extra words.

- Usually Phone and Audio commands can be spoken in a single command.

  For example say, “Call Dave Smith at work,” “Play” followed by the artist or song name, or “Tune” followed by the radio station number.

- Navigation destinations are too complex for a single command. First, say a command that explains the type of destination needed, such as “I want directions to an Address,” “Navigate to an intersection,” “I need to find a Place of Interest or POI,” or “Directions to a Contact.” The system responds by requesting more details. After saying “Place of Interest,” only major chains are available by name. Chains are businesses with at least 20 locations. For other POIs, say the name of a category like “Restaurants,” “Shopping Malls,” or “Hospitals.”

  Some languages support complete destination requests in a single command. If your language supports it, try stating a One-Shot command such as, “Navigate to Address one two three Main Street, Lansing Michigan.” Another example of a One-Shot Destination Entry command is, “Navigate to Place of Interest – Hotels.” If these commands do not work, try saying “Navigate to Place of Interest” or “Navigate to Address” and the system will come back and ask for details of your destination.

  Most languages do not support natural language commands in sentence form. For those languages, use direct commands like the examples shown on the display.

  There is no need to memorise specific command words. Direct commands might be more clearly understood by the system. An example of a direct command would be “Call 555-1212”. Examples of these direct commands are displayed on most of the screens while a voice session is active.

  If “Phone” or “Phone Commands,” is stated, the system understands that a phone call is requested and will respond with questions until enough details are gathered.

  If the phone number has been saved with a name and a place, the direct command should include both, for example “Call Dave Smith at work.”

Using Voice Recognition for List Options

When a list is displayed, a voice prompt will ask to confirm or select an option from that list. A selection
Voice Recognition

Voice Recognition can be made by manually selecting the item, or by speaking the line number for the item to select.

When a screen contains a list, there may be options that are available but not displayed. The list on a voice recognition screen functions the same as a list on other screens. Scrolling or flinging can be used to help display other entries from the list.

Manually scrolling or paging the list on a screen during a voice recognition session suspends the current voice recognition event and plays the prompt “Make your selection from the list using the manual controls or press the Back button to try again.”

If manual selection takes more than 15 seconds, the session terminates and prompts that it has timed out. The screen returns back to the screen where voice recognition was initiated.

The Back Command

Say “Back” or touch \[→\] to go to the previous screen.

If in voice recognition, and “Back” is stated all the way through to the initial screen, then “Back” is stated one more time, the voice recognition session will cancel.

Help

Say “Help” on any voice recognition screen and the help prompt for the screen is played. Additionally, a pop-up displays a text version of the help prompt. Depending on how voice recognition was initiated, the Help pop-up will either display on the instrument cluster or the infotainment display. Touch the Dismiss button to make the pop-up go away.

Pressing \[←\] while the help prompt is playing will terminate the prompt and a beep will be heard. Doing this will stop the help prompt so that a voice command can be used.

Voice Recognition for the Radio

Some audio screens have a voice recognition button (\[←\]) to launch audio voice recognition. If the voice button is touched in a radio screen, the voice commands for radio and media features are available.

“Switch to AM” : Switch bands to AM and tune to the last AM radio station.

“Switch to FM” : Switch bands to FM and tune to the last FM radio station.

“Switch to DAB” : Switch bands to DAB and tune to the last DAB radio station.

“Tune to <AM frequency> AM” : Tune to the radio station whose frequency is identified in the command (like “nine fifty”).

“Tune to <FM frequency> FM” : Tune to the radio station whose frequency is identified in the command (like “one o one point one”).

“Tune to <DAB frequency> DAB” : Tune to the radio station whose frequency is identified in the command (like “one o one point one”).
50 Voice Recognition

Voice Recognition for Navigation

“Navigation” : Begin a dialogue to enter specific destination information.

“Navigation Commands” : Begin a dialogue to enter specific destination information.

“Destination Address” : Begin a dialogue to enter a specific destination address, which includes the entire address consisting of the house number, street name, and city and state.

“Destination Crossroad” : Begin a dialogue to enter a specific destination intersection.

“Destination Place of Interest” : Begin a dialogue to enter a destination Place of Interest category or major brand name (if equipped).

Not all brand names of businesses are available for voice entry. Most major chains, such as chains with more than 20 locations, should be available to search for by name, but the name must be precisely spoken.

Nicknames or short names for the businesses will not likely be found. Lesser known businesses might have to be located by category, such as fast food, hotels, or banks.

“Destination Contact” : Begin a dialogue to enter a specific destination contact name.

“Cancel Route” : End route guidance.

If your language supports it, try stating a One-Shot command to enter a destination address one two three Main Street, Lansing Michigan.” Another example of a One-Shot Destination Entry command is “Navigate to Place of Interest – Hotels.” If these commands do not work, try saying “Navigate to Place of Interest” or “Navigate to Address” and the system will come back and ask for details of your destination.

Voice Recognition for the Phone

“Call <contact name>” : Initiate a call to an entered contact. The command may include location if the contact has location numbers stored.

“Call <contact name> At Home,” “At Work,” “On Mobile,” or “On Other” : Initiate a call to an entered contact and location at home, at work, on mobile device, or on another phone.

“Call <phone number>” : Initiate a call to a standard phone number seven or 10 digits in length.

“Pair Phone” : Begin the Bluetooth pairing process. Follow instructions on the radio display.

“Switch Phone” : Select a different phone for outgoing calls.

“Voice Keypad” : Begins a dialogue to enter special numbers like international numbers. The numbers can be entered in groups of digits with each group of digits being repeated back by the system. If the group of digits is not correct,
the command “Delete” will remove the last group of digits and allow them to be re-entered. Once the entire number has been entered, the command “Call” will start dialling the number.

“Voice Mail” : Initiate a call to voice mail numbers.

**Voice Pass-Thru**

Voice pass-thru allows access to the voice recognition commands on the mobile phone, for example, Siri or Voice Command. See the mobile phone manufacturer's user guide to see if the mobile phone supports this feature. To activate the phone voice recognition system, press and hold $\$\$\$\$ on the steering wheel for a few seconds.
Phone Bluetooth (Overview)
The Bluetooth-capable system can interact with many cell phones, allowing:

- Placement and receipt of calls in a hands-free mode.
- Sharing of the mobile phone's address book or contact list with the vehicle.

To minimise driver distraction, before driving and with the vehicle parked:

- Become familiar with the features of the mobile phone. Organise the phone book and contact lists clearly and delete duplicate or rarely used entries. If possible, program speed dial or other shortcuts.
- Review the controls and operation of the infotainment system.

- Pair mobile phone(s) to the vehicle. The system may not work with all mobile phones. See "Pairing" in this section.

Vehicles with a Bluetooth system can use a Bluetooth-capable mobile phone with a Hands-Free Profile to make and receive phone calls. The infotainment system and voice recognition are used to control the system. The system can be used while in ON/RUN or ACC/ACCESSORY. The range of the Bluetooth system can be up to 9.1 m (30 ft). Not all phones support all functions and not all phones work with the Bluetooth system. See www.gm.com/bluetooth for more information about compatible phones.

Bluetooth Controls
Use the buttons on the infotainment system and the steering wheel to operate the Bluetooth system.

Steering Wheel Controls
]+)/ Press to answer incoming calls, confirm system information, and start voice recognition.

Infotainment System Controls
For information about how to navigate the menu system using the infotainment controls, see Using the System ⇒ 6.

PHONE : Touch this icon on the Home Page to enter the phone main menu.

Audio System
When using the Bluetooth system, sound comes through the vehicle's front audio system speakers and overrides the audio system. Turn the volume knob during a call to change the volume level. The adjusted volume level remains in memory for later calls. The system maintains a minimum volume level.
Bluetooth (Infotainment Controls)

For information about how to navigate the menu system using the infotainment controls, see Using the System 6.

Pairing

A Bluetooth-enabled mobile phone must be paired to the Bluetooth system and then connected to the vehicle before it can be used. See the mobile phone manufacturer’s user guide for Bluetooth functions before pairing the mobile phone.

Pairing Information

- A Bluetooth phone with music capability can be paired to the vehicle as a phone and a music player at the same time.
- Up to 10 devices can be paired to the Bluetooth system.
- The pairing process is disabled when the vehicle is moving.
- Pairing only needs to be completed once, unless the pairing information on the mobile phone changes or the mobile phone is deleted from the system.
- One Bluetooth device can be connected to the Bluetooth system at a time.
- If multiple paired cell phones are within range of the system, the system connects to the paired cell phone in the order that they were last used in the system. To link to a different paired phone, see "Linking to a Different Phone" later in this section.

Pairing a Phone

1. Touch PHONE on the Home Page.
2. Select Phone and select Pair Device.
3. A four-digit Personal Identification Number (PIN) appears on the display. The PIN, if required, may be used in Step 5.
4. Start the pairing process on the mobile phone to be paired to the vehicle. See the mobile phone manufacturer’s user guide for information on this process.
5. Locate "Chevrolet MyLink" on the display. Follow the instructions on the mobile phone to enter the PIN provided in Step 3 or confirm the six-digit code shown on the display. After the PIN is successfully entered or the code is confirmed, the system responds with "<Device name> has been successfully paired" when the pairing process is complete.
6. If "Chevrolet MyLink" does not appear, turn the phone off or remove the phone battery and retry.
7. If the phone prompts to accept connection or allow phone book download, select always accept and allow. The phone book may not be available if not accepted.
8. Repeat Steps 1-7 to pair additional phones.
54 Phone

Listing All Paired and Connected Phones
1. Touch PHONE on the Home Page.
2. Select Phones.

Disconnecting a Connected Phone
1. Touch PHONE on the Home Page.
2. Select Phones.
3. Touch \( \times \) next to the phone to disconnect.

Deleting a Paired Phone
Only disconnected phones can be deleted.
1. Touch PHONE on the Home Page.
2. Select Phones.
3. Touch the \( \bigcirc \) next to the phone to delete and follow the on screen prompts.

Linking to a Different Phone
To link to a different phone, the new phone must be in the vehicle and paired to the Bluetooth system.

1. Touch PHONE on the Home Page.
2. Select Phones.
3. Select the new phone to link to from the not connected device list.

Making a Call Using Contacts and Recent Calls
Calls can be made through the Bluetooth system using personal mobile phone contact information for all phones that support the Phone Book feature. Become familiar with the phone settings and operation. Verify the mobile phone supports this feature.

When supported, the Contacts and Recent Calls menus are automatically available.

The Contacts menu accesses the phone book stored in the mobile phone.

The Recent Calls menu accesses the recent call list(s) from your mobile phone.

To make a call using the Contacts menu:
1. Touch PHONE on the Home Page.
2. Select Contacts.
3. Select the name to call.
4. Select the desired contact number to call.

Switching to Handset or Handsfree Mode
To switch between handset or handsfree mode, touch PHONE on the Home Page to display “Call View.”

- While the active call is hands-free, touch the Handset screen button to switch to the handset mode. The screen button changes to Handsfree once the Bluetooth device confirms it is operating as handset.
- While the active call is handset, touch the Handsfree screen button to switch to the hands free mode. The screen button changes to Handset once the Bluetooth device confirms it is operating as handsfree.

Making a Call Using Contacts and Recent Calls
Calls can be made through the Bluetooth system using personal mobile phone contact information for all phones that support the Phone Book feature. Become familiar with the phone settings and operation. Verify the mobile phone supports this feature.

When supported, the Contacts and Recent Calls menus are automatically available.

The Contacts menu accesses the phone book stored in the mobile phone.

The Recent Calls menu accesses the recent call list(s) from your mobile phone.

To make a call using the Contacts menu:
1. Touch PHONE on the Home Page.
2. Select Contacts.
3. Select the name to call.
4. Select the desired contact number to call.
To make a call using the Recent Calls menu:
1. Touch the Phone screen button.
2. Select Recent.
3. Select the name or number to call.
4. If necessary, select between Missed, Recent, and Sent calls by selecting the View button in the top right corner of the list.

Making a Call Using the Keypad
To make a call by dialling the numbers:
1. Touch PHONE on the Home Page.
2. Select Keypad and enter a phone number.
3. Select Call to start dialling the number.

Accepting or Declining a Call
When an incoming call is received, the infotainment system mutes and a ring tone is heard in the vehicle.

Accepting a Call
There are a few ways to accept a call:
- Press \( \text{.accept} \) on the steering wheel controls.
- Touch Answer on the infotainment display.

Declining a Call
There are a few ways to decline a call:
- Press \( \text{Decline} \) on the steering wheel controls.
- Touch Ignore on the infotainment display.

Call Waiting
Call waiting must be supported on the Bluetooth phone and enabled by the wireless service carrier to work.

Accepting a Call
There are a few ways to accept a call-waiting call:
- Press \( \text{.accept} \) on the steering wheel controls.
- Touch Ignore on the infotainment display.

Declining a Call
There are a few ways to decline a call-waiting call:
- Press \( \text{Decline} \) on the steering wheel controls.
- Touch Ignore on the infotainment display.

Switching Between Calls (Call Waiting Calls Only)
To switch between calls, touch PHONE on the Home Page to display “Call View.” While in Call View, touch the call information of the call on hold to change calls.

Three-Way Calling
Three-way calling must be supported on the Bluetooth phone and enabled by the wireless service carrier to work.

To start a three-way call while in a current call:
1. In the Call View, select Add to add another call.
56 Phone

2. Initiate the second call by selecting from Recent, Contacts, or Keypad.

3. When the second call is active, touch Merge to conference the three-way call together.

4. Once all calls are merged, the Merge button becomes an Unmerge button. Touch to unmerge the calls. Some wireless service carriers may not allow a merged call to become unmerged.

Ending a Call

- Press  on the steering wheel controls.
- Touch End on the infotainment display to end all existing calls, or touch End next to a call to end only that call.

Some wireless service carriers may not allow a merged call to become unmerged.

Dual Tone Multi-Frequency (DTMF) Tones

The in-vehicle Bluetooth system can send numbers during a call. This is used when calling a menu-driven phone system.

1. Touch PHONE on the Home Page.

2. While in the Call View, touch  to raise the interaction selector.

3. Select Keypad and enter the number.

Voice Mail

The default voice mail number is the phone number of the currently connected phone. The voice mail number can be changed in Bluetooth settings.

To dial a voice mail number:

1. Touch PHONE on the Home Page.

2. Select Voice Mail.

3. Select Call.

4. Enter the DTMF tones using the keypad if needed.

Bluetooth (Voice Recognition)

Using Bluetooth Voice Recognition

To use voice recognition, press  on the steering wheel controls. Use the commands below for the various voice features. For additional information, say “Help” while in a voice recognition menu. See Voice Recognition 46 for help using voice recognition commands.

Making a Call

Calls can be made using the following commands.

Using the "Dial" or "Call" Command

To call a number:

1. Press  . The system responds “Command Please,” followed by a tone.
2. Say “Dial” or “Call” followed by the complete phone number.

Use the “Voice Keypad” command for international numbers or special numbers which include * or #.

Once connected, the person called will be heard through the audio speakers.

To call using a contact from your phone book:

1. Press \%\%. The system responds “Command Please,” followed by a tone.

2. Say “Dial” or “Call” and then say the contact name. For example “Call John at Work.”

Once connected, the person called will be heard through the audio speakers.

Calling the Three Digit Emergency Number

1. Press \%\%. The system responds “Command Please,” followed by a tone.

2. Say “Call <three digit emergency number>.”

Once connected, the person called will be heard through the audio speakers.

Using the “Switch Phone” Command

1. Press \%\%. The system responds “Command Please,” followed by a tone.

2. After the tone, say “Switch Phone.” The system displays a list of phones to select.

Using the “Voice Keypad” Command

1. Press \%\%. The system responds “Command Please,” followed by a tone.

2. After the tone, say “Voice Keypad.” The system allows entry of special numbers and characters.

Using the “Voice Mail” Command

1. Press \%\%. The system responds “Command Please,” followed by a tone.

2. After the tone, say “Voice Mail.” The system dials the voice mail number of the connected phone.

Clearing the System

Unless information is deleted out of the vehicle Bluetooth system, it will be retained. This includes phone pairing information. For directions on how to delete this information, see “Deleting a Paired Phone.”

Text Messaging

If equipped, the infotainment system may allow text messages to be received and replied to. Received messages can also be read aloud.

Before using the text messaging feature, check to see if the phone is compatible.

See your retailer for details.

Text Menu

**Inbox**: Touch to display incoming messages. To view a message, touch the name of the sender.

Touch \%\% to listen to the text
message. Press BACK on the faceplate or touch to go back to the previous menu.

**Settings**: See "Text Settings" later in this section.

**Reply**: Touch to reply using a predefined text message. See "Text Settings."

**Call**: Touch to place a call to the sender of the text message.

### Viewing a Text Message

While viewing a text message:

- Touch Reply to reply using a predefined text message.
- Touch Call to place a call to the sender of the text message.

### Viewing Sender Information

If equipped, touch the name of the sender to view sender information if this information matches contact information already stored.

**Select a Predefined Message**:

Touch to select from a set of quick messages. Touch the message to send.

### Predefined Messages

These are short text messages that can be used to send so responses will not have to be typed.

The messages can be deleted or a new message can be added.

To add a new message:

1. Touch Text Settings, then touch Manage Predefined Messages.
2. While in the predefined messages list view, select Add New Predefined Message and a keyboard displays.
3. Type a new message and touch NEW MSG when done to add the message. Press BACK on the faceplate or touch to go back to the predefined messages list. Touch to delete one character at a time.

### Memory Full

This message may display if there is no more room on the phone to store messages.

### Text Settings

**Text Alerts**: When on, this feature will display an alert when a new text message has been received. Touch to turn on or off.

**Manage Predefined Messages**: Touch to add, change, or delete predefined messages.

### Apple CarPlay and Android Auto

If equipped, Android Auto™ and/or Apple CarPlay™ capability may be available through a compatible smartphone. If available, PROJECTION will appear on the Home Page of the infotainment display.

To use Android Auto and/or Apple CarPlay:

1. Download the Android Auto app to your phone from the Google™ Play store. There is no app required for Apple CarPlay.
2. Connect your Android phone or Apple iPhone by using the compatible phone USB cable and plugging into a USB data port. For best performance, use the device’s factory-provided USB cable. Aftermarket or third-party cables may not work.

PROJECTION on the Home Page will change to Android Auto or Apple CarPlay depending on the phone. Android Auto and/or Apple CarPlay may automatically launch upon USB connection. If not, touch ANDROID AUTO and/or APPLE CARPLAY on the Home Page to launch.

For further information on how to set up Android Auto and Apple CarPlay in the vehicle, see your dealer.

Android Auto is provided by Google and is subject to Google's terms and privacy policy. CarPlay is provided by Apple and is subject to Apple's terms and privacy policy. For Android Auto support see https://support.google.com/androidauto or Apple CarPlay support at https://www.apple.com/ios/carplay/ for more information. Apple or Google may change or suspend availability at any time. Android Auto is a trademark of Google Inc.; Apple CarPlay is a trademark of Apple Inc.
Settings

The Settings menu allows adjustment of different vehicle and radio features. The menu may contain the following:

**Time and Date**

Touch \( \uparrow \) or \( \downarrow \) to increase or decrease hours, minutes, and AM or PM. Touch 12Hr or 24Hr for 12 or 24 hour clock. Touch \( \uparrow \) or \( \downarrow \) to increase or decrease month, day, or year. See "Clock" in the owner manual.

**Language**

This will set the display language in the radio, instrument panel, and voice recognition. Touch Language and select the appropriate language. Touch \( \leftarrow \) to go back to the previous menu.

**Radio**

Touch to display the Radio Menu and the following may display:

- **Manage Favourites:** Touch to highlight a favourite to edit. Touch Rename to rename the favourite or Delete to delete it. Touch and hold the station to drag it to a new location. Touch Done to go back to the previous menu.

**Valet Mode**

If equipped, this will lock the infotainment system and steering wheel controls. It may also limit top speed, power, and access to vehicle storage locations (if equipped).

To enable Valet Mode:

1. Enter a four-digit code on the keypad.
2. Touch Enter to go to the confirmation screen.
3. Re-enter the four-digit code.

Touch LOCK or UNLOCK to lock or unlock the system. Touch \( \leftarrow \) to go back to the previous menu.

**Number of Favorites Shown:** Touch to set the number of favourites to display. Select Auto, 5, 10, 15, 20, 25, 30, 35, 40, 45, 50, 55, or 60. Auto will adjust the number of favourite locations that can be seen. Touch \( \leftarrow \) to go back to the previous menu.

**Auto Volume (If Equipped):** This feature adjusts the volume based on the vehicle speed. See AM-FM Radio \( \uparrow \) 9.

**Bose AudioPilot noise compensation technology (If Equipped):** This feature adjusts the volume based on the noise in the vehicle and speed. See AM-FM Radio \( \uparrow \) 9.

**Maximum Start-Up Volume:** This feature sets the maximum start-up volume. If the vehicle is started and the volume is greater than this level, the volume is adjusted to this level. To set the maximum start-up volume, touch + or − to increase or decrease. Touch \( \leftarrow \) to go back to the previous menu.
• Audio Cue Volume (If Equipped): This feature adjusts the start-up and shut-down sounds. To adjust the volume, touch + or − to increase or decrease. This feature can be turned on or off. Touch \( \rightarrow \) to go back to the previous menu.

Vehicle Settings
See "Vehicle Personalisation" in the owner manual.

Bluetooth
From the Bluetooth screen button, the following may be displayed:
• Pair New Device: Touch to add a new device.
• Device Management: Touch to connect to a different phone source, disconnect a phone, or delete a phone.
• Ringtones: Touch to change the ring tone for the specific phone. The phone does not need to be connected to change the ring tone.

Voice Mail Numbers: This feature displays the voice mail number for all connected phones. The voice mail number may be changed by touching the Edit button, typing in the new number, and touching Save. Touch \( \rightarrow \) to go back to the previous menu.

Text Message Alerts: This feature will turn text message alerts on or off. Touch Text Message Alerts and then select OFF or ON. Touch \( \rightarrow \) to go back to the previous menu. See Text Messaging 57.

Prompt Length: Select Short for brief, direct feedback or Long for more information feedback. Touch \( \rightarrow \) to go to the previous menu.

Audio Feedback Speed: Touch Slow, Medium, or Fast for feedback speed. Touch \( \rightarrow \) to go back to the previous menu.

Display
From the Display screen button, the following may be displayed:
• Mode: Touch Auto, Day, or Night to adjust the display. Touch \( \rightarrow \) to go to the previous menu.
• Calibrate Touchscreen: Touch to calibrate the infotainment display and follow the prompts. Touch \( \rightarrow \) to go back to the previous menu.
• Turn Display Off: Touch to turn the display off. Touch anywhere on the display area or any faceplate button again to turn the display on.
62 Settings

Rear Camera
Touch to display the Rear Camera menu. See "Driver Assistance Systems" in the owner manual.

Return to Factory Settings
Touching Continue restores all factory settings.
Select Return to Factory Settings and the following list may display:

- Restore Vehicle Settings: Restores factory vehicle personalisation settings. Touch Restore Vehicle Settings. Touch Cancel or Continue. If continue is touched, a confirmation pop-up will appear indicating the vehicle settings have been restored.

- Clear All Private Data: If available, use to erase personal private data before loaning or selling the vehicle. Touch Clear All Private Data. Touch Cancel or Continue. If continue is touched, a confirmation pop-up will appear indicating all private data has been cleared from the system.

- Restore Radio Settings: Restores factory radio settings. Touch Restore Radio Settings. Touch Cancel or Continue. If continue is touched, a confirmation pop-up will appear indicating the radio settings have been restored.

Press ⬅️ BACK on the faceplate or touch ➡️ to go back to the main settings menu.

Over-the-Air Software Updates
If equipped, the infotainment system can download and install software updates over a wireless connection. The system will prompt high priority updates to be downloaded and installed, while others can be manually accessed. To manually check for updates, touch Settings on the Home Screen, followed by Software Information, and then System Update. Follow the on-screen prompts. Steps for downloading and installing updates may vary by vehicle.

Downloading Over-the-Air software updates requires Internet connectivity, which can be accessed through the vehicle’s OnStar Wi-Fi hotspot, if equipped. Optionally, a secured Wi-Fi hotspot such as a mobile device hotspot, a home hotspot, or a public hotspot can be used. To connect the infotainment system to a secured mobile device hotspot, home hotspot, or public hotspot, touch Settings on the Home Screen, followed by Wi-Fi, and then Manage Wi-Fi Networks. Select the appropriate Wi-Fi network, and follow the on-screen prompts. Download speeds may vary. On most mobile devices, activation of the Wi-Fi hotspot is in the Settings menu under Mobile Network Sharing, Personal Hotspot, Mobile Hotspot, or similar.

Availability of Over-the-Air software updates varies by vehicle and country.

Low Fuel Alert
If the vehicle reaches a low fuel level, the system displays an alert about the low fuel condition. Touch
the More Info screen button to view nearby petrol stations, and start guidance if desired.

If the remaining driving distance is available from the system, this is included in the alert.

**English and Metric Unit Conversion**

To change the display units between English and metric units, see "Instrument Cluster" in the owner manual.
64 Trademarks and Licence Agreements

Trademarks and Licence Agreements

This vehicle has systems that operate on a radio frequency which are in the scope of Directive 1999/5/EC or 2014/53/EU.

These systems are in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC or 2014/53/EU.

Made for iPod and iPhone

"Made for iPod," and "Made for iPhone," mean that an electronic accessory has been designed to connect specifically to iPod or iPhone, respectively, and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards. Please note that the use of this accessory with iPod or iPhone may affect wireless performance. iPhone®, iPod®, iPod classic®, iPod nano®, iPod shuffle®, and iPod touch® are trademarks of Apple Inc., registered in the U.S. and other countries.

Bose®

Bose, AudioPilot, Centerpoint, and Bose Surround are registered trademarks of Bose Corporation in the U.S. and other countries.

DTS

For DTS patents, see http://patents.dts.com. Manufactured under licence from DTS Licensing Limited. DTS, the Symbol, & DTS, and the Symbol together are registered trademarks, and DTS 2.0 Channel is a trademark of DTS, Inc. ©DTS, Inc. All Rights Reserved.

Dolby

Manufactured under license from Dolby Laboratories. Dolby and the double-D symbol are trademarks of Dolby Laboratories.

DivX®

DivX®, DivX Certified®, and associated logos are trademarks of DivX, LLC and are used under licence.

This DivX Certified® device has passed rigorous testing to ensure it plays DivX® video.

To play purchased DivX movies, first register your device at vod.divx.com. Find your registration code in the DivX VOD section of your device setup menu.

This product is protected by certain intellectual property rights of Microsoft. Use or distribution of such technology outside of this product is prohibited without a license from Microsoft.

For more information on the Software, including any open source software license terms (and available source code) as well as copyright attributions applicable to the Runtime Configuration indicated above, please contact the Manufacturer or contact QSSC at 175 Terence Matthews Crescent, Kanata, Ontario, Canada K2M 1W8 (licensing@qnx.com).

Map End User License Agreement

END USER TERMS
The Map Data Disc ("Data") is provided for your personal, internal use only and not for resale. It is protected by copyright, and is subject to the following terms (this "End User License Agreement") and conditions which are agreed to by you, on the one hand, and HERE North America, LLC ("HERE") and its licensors (including their licensors and suppliers) on the other hand.
**TERMS AND CONDITIONS**

Personal Use Only: You agree to use this Data for the solely personal, noncommercial purposes for which you were licensed, and not for service bureau, timesharing or other similar purposes. Except as otherwise set forth herein, you agree not to otherwise reproduce, copy, modify, decompile, disassemble or reverse engineer any portion of this Data, and may not transfer or distribute it in any form, for any purpose, except to the extent permitted by mandatory laws. You may transfer the Data and all accompanying materials on a permanent basis if you retain no copies and the recipient agrees to the terms of this End User License Agreement. Multi-disc sets may only be transferred or sold as a complete set as provided to you and not as a subset thereof.

Restrictions

Except where you have been specifically licenced to do so by HERE and without limiting the preceding paragraph, you may not (a) use this Data with any products, systems, or applications installed or otherwise connected to or in communication with vehicles capable of vehicle navigation, positioning, dispatch, real time route guidance, fleet management or similar applications; or (b) with, or in communication with, including without limitation, mobile phones, palmtop and handheld computers, pagers, and personal digital assistants or PDAs.

**Warning**

This Data may not contain accurate information due to period of survey, constant change in points of interests, new road constructions or any other factors.

**No Warranty**

This Data is provided to you “as is,” and you agree to use it at your own risk. HERE and its licensors (and their licensors and suppliers) make no guarantees, representations, or warranties of any kind, express or implied, arising by law or otherwise, including but not limited to, content, quality, accuracy, completeness, effectiveness, reliability, fitness for a particular purpose, usefulness, use or results to be obtained from this Data, or that the Data or server will be uninterrupted or error free.

**Disclaimer of Warranty**

THE DATABASE IS PROVIDED ON AN "AS IS" AND "WITH ALL FAULTS BASIS" AND BOSCH (AND THEIR LICENSORS AND SUPPLIERS) EXPRESSLY DISCLAIM ALL OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY, SATISFACTORY QUALITY, ACCURACY, TITLE AND FITNESS FOR A PARTICULAR PURPOSE. NO ORAL OR WRITTEN ADVICE OR INFORMATION PROVIDED BY BOSCH (OR ANY OF THEIR LICENSORS, AGENTS, EMPLOYEES, OR THIRD PARTY PROVIDERS) SHALL CREATE A WARRANTY, AND YOU ARE NOT ENTITLED TO RELY ON ANY SUCH ADVICE OR INFORMATION.
THIS DISCLAIMER OF WARRANTIES IS AN ESSENTIAL CONDITION OF THIS AGREEMENT.

Disclaimer of Liability
HERE AND ITS LICENSORS (INCLUDING THEIR LICENSORS AND SUPPLIERS) SHALL NOT BE LIABLE TO YOU IN RESPECT OF ANY CLAIM, DEMAND OR ACTION, IRRESPECTIVE OF THE NATURE OF THE CAUSE OF THE CLAIM, DEMAND OR ACTION ALLEGING ANY LOSS, INJURY OR DAMAGES, DIRECT OR INDIRECT, WHICH MAY RESULT FROM THE USE OR POSSESSION OF THIS DATA; OR FOR ANY LOSS OF PROFIT, REVENUE, CONTRACTS OR SAVINGS, OR ANY OTHER DIRECT, INDIRECT, INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF YOUR USE OF OR INABILITY TO USE THIS DATA, ANY DEFECT IN THIS DATA, OR THE BREACH OF THESE TERMS OR CONDITIONS, WHETHER IN AN ACTION IN CONTRACT OR TORT OR BASED ON A

WARRANTY, EVEN IF HERE OR ITS LICENSORS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. Some States, Territories, and Countries do not allow certain liability exclusions or damages limitations, so to that extent the above may not apply to you.

Export Control
You agree not to export from anywhere any part of the Data provided to you or any direct product thereof except in compliance with, and with all licenses and approvals required under, applicable export laws, rules and regulations. Entire Agreement: These terms and conditions constitute the entire agreement between HERE (and its licensors, including their licensors and suppliers) and you pertaining to the subject matter hereof, and supersedes in their entirety any and all written or oral agreements previously existing between us with respect to such subject matter.

Governing Law
The above terms and conditions shall be governed by the laws of the State of Illinois, without giving effect to (i) its conflict of laws provisions, or (ii) the United Nations Convention for Contracts for the International Sale of Goods, which is explicitly excluded. You agree to submit to the jurisdiction of the State of Illinois for any and all disputes, claims, and actions arising from or in connection with the Data provided to you hereunder.

Government End Users
If the Data is being acquired by or on behalf of the United States government or any other entity seeking or applying rights similar to those customarily claimed by the United States government, this Data is a "commercial item" as that term is defined at 48 C.F.R. ("FAR") 2.101, is licensed in accordance with this End User License Agreement, and each copy of Data delivered or otherwise furnished shall be marked and embedded as
appropriate with the following "Notice of Use," and be treated in accordance with such Notice:

© 2015 HERE North America, LLC. All rights reserved.

If the Contracting Officer, federal government agency, or any federal official refuses to use the legend provided herein, the Contracting Officer, federal government agency, or any federal official must notify HERE North America, LLC prior to seeking additional or alternative rights in the Data.
